

Saint Paul Public Schools
 Secondary Class Size Report
 2005-2006 School Year

Introduction

The following report indicates class sizes in middle/junior high schools in Saint Paul Public Schools as of mid-October, 2005. Each section shows first a table for the district as a whole, then a table for each individual school within the district. The district-wide table shows district-wide averages for those departments identified in the district's course numbering system. The table for each school shows the average class size in each of the seven largest subject areas in junior high/middle schools, plus the school-wide average size for non-Special Education classes. Also noted is the number of periods in the day and the number of terms in the school year at each school.

The report is based on the number of students scheduled to be in a classroom. Please see the Appendix for notes on how certain special situations were handled. Also please note that this report includes only those classes being taught during the first term of the year in each school.

Junior High Schools

District Totals
